

maynard SELECT

HISTORY

Maynard Select, LLC has a long and very distinguished history of service. The company was established by Henry Horrell in 1938 as a **refrigeration service** company. Horrell Refrigeration was purchased by Robert Maynard in 1971, and the corporate name was changed to Maynard Food Store Equipment. In 1991 the company purchased the assets of Ficturcraft and the corporate name was changed to Maynard-Ficturcraft, Inc. This purchase expanded the company's product line because of Ficturcraft's strong customer following in the field of **restaurant equipment**.

In 2006 Select Air Services was launched with Pete Zabaski as the CEO. Select Air Services grew as a **Commercial HVAC services provider** for the state of TN and for local businesses and property managers. In November 2011, Select Air Services acquired Maynard-Ficturcraft, forming Maynard Select, LLC. At the same time, the geothermal HVAC assets of a company named Choice Mechanical were purchased to expand the company's expertise in the growing, exciting field of **geothermal HVAC**.

2012 was a great year for the company as the whole company relocated to 617 Norris Ave, Nashville TN and grew its **residential HVAC business** as well. In early 2013 the company acquired the assets of Integrated Controls Corporation, a local leader in both **mechanical controls and solar installation**.

On December 31, 2015 Pete Zabaski retired and David McGaw took the reins as President and CEO.

Maynard Select has an unlimited CMC and Electrical License (License # 57525) and is fully bondable.

STRENGTHS

- The capability to provide a "one-stop" shop for business partners + deep expertise in specific disciplines
- Comprehensive services for residential and commercial customers including design, installation, maintenance and repair
